

## How to submit your manuscript to the RRC database

Yasunori Sasakura 20th April 2018

Modified 26th January 2023

The RRC site provides a database of manuscripts that use NBRP resources. Please submit manuscript information described below when your manuscript is accepted.

### [How to submit]

(1) Please go to <https://rrc.nbrp.jp/>.

Push the “English” button at left if appropriate.

(2) Click the “Registration” button near the top of the page.

(3) Enter the Pubmed ID of your manuscript (eight digits) in the blank.

(4) Select *C. intestinalis*/ (*O. japonicus*) in the “Species” column.

(5) Enter the resource name(s) you used in your manuscript. The name(s) must be accurate.

For wild types, type “Wild C. int” (without quotation marks).

For transgenic lines vectors, copy and paste the name in the CITRES database (<http://marinebio.nbrp.jp/ciona/>). For example, Tg[MiTFr3dTPOG]45.

When two or more resources are used, press the Enter key after each resource to divide the names. For example:

Wild C. int

Tg[MiTFr3dTPOG]45

pMiCiBraG

(6) Press the “Submit” button below. A confirmation page will appear. Push the “Submit” button again if the information is correct.

Thank you for your cooperation.
