

Dear NBRP Ciona resource users,

We plan to increase the resource price from April 1. This revision is based on the security upgrade (improvement of the 3D secure authentication) of the payment site, and the prices will increase by approximately 5 JPY per order. The new price list is attached to this email.

This revision will be applied at 10 am on April 1st (JST). For wild types, the new fees will be adopted from the second week of April shipment. As announced previously in Dr. Satou's mail, this day has the system upgrade. Please do not place your order until 10 am for the shipments in the second week of April or later. About transgenic lines, we will announce to the person if you are planning to order during the transition.

In addition to this modification, we have prepared the price lists of transgenic juveniles, adults, and fixed specimens abroad. Moreover, the English page for wild types will open shortly. We would like to receive your order. Thank you for your cooperation.

Sincerely,

Yasunori Sasakura
